

8 FREIGHT

For business, leisure and family. The only bike you will ever need.

Weighing little more than a standard bicycle, the 8 Frieght will carry all kinds of goods, garden equipment, children, animals and general rubbish.

Ideal for business, leisure and family, it may become the most useful tool you own!

Fact
THE CARGO LOAD IS MORE STABLE BEHIND THE RIDER
OUR BIKES ARE BUILT WITH ADVANCED ALUMINIUM
Steel is so last century!

"...18 gallon barrels of beer, washing machines, a chest of drawers, headboards, children, lots of print..."

Cyclone Couriers, York

"...versatile and fast, can carry all but the largest of loads."

Velo Vision Magazine

"We deliver equipment across London and estimate that the 8 Freight bikes are four times faster than using a car. We weren't cyclists before, but because we are saving over £3000 a year on congestion charges, parking and fines, we are now!"

Andre, Media Hire Company, London

8 FREIGHT

You can finally live in the modern world without a motor car permanently parked in your drive. (Hire one when really need it.)

The 8 Freight can carry almost anything you would in a car and lots of things you would not! And should you be popping down to the shop, the bike's low weight and relaxed handling make it a nice ride, so nice you probably won't even notice how much exercise you're getting. Once you've discovered how practical and fun the 8 Freight is, you won't need to go to the gym again.

With the load carried behind the rider for stability, it has the ability to carry a small van or car load at the speed, price and efficiency of a bicycle.

8 Freight

Price: £1895

Weight: 23kg
